# Icon Guide

## Steelite International Lifetime Edge-Chip Warranty

Your assurance that all Performance and Distinction products manufactured in our UK factory are fit for purpose.

## Steelite International Made For Life

Each piece is inspected, examined and tested so you can be confident it will withstand the rigours of the modern commercial kitchen

## 5 Year Edge Chip Warranty

Warrants a selection of products against edge chipping under normal usage conditions during the service life of the product.

## 1 Year Edge Chip Warranty

Warrants a selection of products against edge chipping under normal usage conditions during the service life of the product.

## Electrical Warranty

## Stacking

Items that are designed to stack when space is at a premium.

## Dishwasher Safe

## Glasswasher Safe

## 100% Recycled

Made from 100% recycled glass.

## Crystal

A selection of glassware ranges that are made from fine crystal giving clarity and finer rims.

## Toughened Rim

Many glassware items have strengthened rims to reduce chipping and breakage.

## Toughened Glass

Fully toughened glassware withstands greater impact, making the glass stronger therefore increasing longevity, when it finally does break it will break into small blunt pieces increasing safety.

## Rim and Foot Guarantee

The rim & foot guarantee on a selection of products allows for free of charge replacement of breakages to the rim or foot of glassware.

## Pasabahce Product

Many of our glassware ranges are from our exclusive supply partner Pasabahce, these glassware items offer exceptional quality and design.

## Activator Max

A laser nucleation technology to further enhance the appearance of carbonated drinks.

## Lined & CE

Many of our glassware items can be government stamped and lined to satisfy all European legal hospitality requirements.

## Polycarbonate

Polycarbonate is a very strong and virtually unbreakable plastic, the strongest plastic of all.

## SAN

Styreneacrylonitrile is stronger than polystyrene and can take a high amount of usage but will break under heavy pressure.

## Polystyrene

Not as strong as Polycarbonate, Polystyrene items are often used for shot glasses where strength is not as important.

## Cutlery Personalisation

Eternum cutlery can be personalised through colour coating, stamping, etching, laser engraving and diamond engraving.

## EN13432 Accreditation

This certification focusses on compostability, making sure Utopia's non-metallic paper straws adhere to strict standards concerning biodegrading so they only have a positive impact on the environment.

## Chafing Fuel

## Liquid Candle

## Care Guide & Information

The first taste is with your eyes! So to make sure you get the best return from the products you select for your outlet, we have included advice on care and usage to make sure that longevity in service and appearance is enhanced. This will make sure you receive the maximum benefit from your investment in Tableware.

# Care Guide & Information

## Ceramic

### Storing:

- Placing rubber or plastic mats on large stainless steel surfaces usually found in industrial kitchens can help reduce metal marking to ceramics.
- Rubber or plastic mats can also be placed in stacking areas, trolleys or sinks to further reduce the chance of metal marking.
- Replace or repair any plastic coated racks that may have become worn and the metal underneath exposed, as this again could cause damage to your ceramics.
- Do not stack items more than 15" high.
- Only stack products that are designated as stackable.

### Using:

- Don't scrape off leftovers - wipe off with a paper towel or a plastic/rubber scraper.
- Do not slide items across each other to reduce abrasions.
- Minimise handling to reduce glaze abrasion.
- Be sure to rotate your stock to prevent uneven wear.
- Use cutlery that is of a high grade steel as a minimum requirement, as some cutlery in use today is made from low grade steel, which being soft in nature increases the chance of metal marking.
- Using metal utensils against ceramics can also cause metal marking, try to keep this to a minimum or use plastic utensils.

### Washing:

- Seventy percent of product damage/loss occurs at the dishwasher table. To avoid such damage, ensure that the dishwasher table has sufficient space to store dirty items and avoid overloading trays or trolleys.
- To ensure the quality level of the product it is important to take note of the following:
  - Items should be washed within 45 minutes of removal from the table and pre-rinsed.
  - Abrasive cleaning aids should not be used, i.e. scouring pads, steel wool, etc.

- All items should be separated into type prior to washing.
- Stack ceramics separately to other crockery in the dishwasher such as cutlery or pans and ensure items do not vibrate against each other during the cycle.
- Avoid contact between ceramics, dinnerware and metals.
- Strictly follow recommended dishwashing procedures set out by the manufacturer and use the correct dose application of the detergent.
- The use of an approved detergent is recommended.
- For effective cleaning, we recommend that the dishwashing temperature and the final rinse be set between 55 to 60°C. Operating at higher temperature levels in order to wash crockery 'properly' is a definite case of overkill and detrimental to all tableware.
- Repair or replace any plastic coated metal in the dishwasher that may have worn away as this may result in metal marking.
- Overdosing on detergent or using excessively high temperatures will cause deterioration to the glazed finish or damage any decoration on the product.

### Metal Marking:

- Metal marking occurs when a ceramic item comes into contact with metal surfaces or utensils, which can cause metal tracing to be left on the ceramic item due to certain types of steel being softer than the glaze of the ceramic.
- Despite the unsightly appearance of metal marking, it is not a cause for concern as it can be easily removed by the application of a gentle household non-abrasive cleaner.

### Custom Decoration:

- Gold and platinum decorations are not microwave safe.
- Utopia ceramics are suitable for microwave use, however be advised that any decorated item that includes metal will not be microwave safe.
- Hand washing is recommended to prolong the metallic lustre of decoration.
